

Project Portfolio 5

Lake Home Escape

This 1969 walk out rambler on Linwood Lake original home complemented this lake front property, but lack of maintenance and dated materials called for a re-creation from the foundation up. Green building principals were important in selecting materials and building methods, hence, the additional foundation was poured with energy saving ICF's (insulated concrete forms). The main floor was lifted for higher ceilings and a better lot presence. A variety of natural woods, ceramic and stone are finishes perfect for a Prairie Classic home decor. Electrolux kitchen appliances make this two cook kitchen perfect for entertaining.
